

Hi!
I'm Ronnie Recycler.
Today I'm going to tell
you about recycling milk
and juice cartons with
Mpact Recycling.

100% of every milk or juice
carton is recyclable.

Cartons come in all
shapes and sizes
and are generally
filled with a
variety of food
and beverages.

Used cartons are a valuable resource,
easily recycled and much in demand.

Recycling your beverage cartons helps save the environment

You can play a role in the transformation of used carton waste into a wide range of useful paper, cardboard and other products with Tetra Pak® and Mpact Recycling.

Recycling your empty cartons is easy!

Once your carton is empty

- 1 Take the cap off
- 2 Turn up the top and the bottom corners
- 3 Flatten the carton
- 4 Put the cap back on or leave the straw in the carton
- 5 Place the carton in your local recycling container

Did you know?

Mpact Recycling processes the cartons through a special pulping process, where the paperboard reduces into a pulp and separates from the polyalu layer. The pulp is then used to make new paper-based products.
