

Your role as a consumer in the circular economy*

smarter, sustainable solutions

NATIONAL RECYCLING DAY
20 September 2019

On **NATIONAL RECYCLING DAY**, Mpact Recycling urges consumers to recycle at home, schools and work. Recycling not only saves resources and combats climate change, it also makes economic sense.

* In the circular economy, recyclable waste is collected and placed back into the recycling system and into the manufacturing process to make new products. This process diverts valuable waste from landfills.

Understand YOUR role in the circular economy:

- 1 Interrogate your waste and ask yourself #AreYouGoingToRecycleThat
- 2 #SeparateAtSource
