**EVERY YEAR, MORE AND MORE
LANDFILLS LOOK LIKE THIS**

**RECYCLING
REDUCES
POLLUTION
& LITTER**

clearing the way
towards a cleaner,
greener and
healthier society

**RECYCLING
PAPER SAVES
LANDFILLS
NOT TREES!**

Paper is **NOT** made from
the wood of rainforests and
indigenous trees. Paper
is produced **ONLY** from
plantation grown trees,
just as bread is made from
farmed wheat etc.

1000 KG
of recovered
paper saves
**3 CUBIC
METRES**
of landfill
space

**LIMIT
GREENHOUSE
GASES**

When paper
degrades in a
landfill it adds to
the greenhouse
gases in the air
